

The EcoLabel Project

Creating the future together.

The EDSP EcoLabel application adds significant value to eco-startups and projects by delivering a decentralized platform that runs eco-applications which execute exactly as programmed without any possibility of downtime, censorship, fraud or third-party interference.

EcoLabel provides real-time insight into the realization of actual sustainable and durable progress which is registered, measured and made visible for the public and transformed into cryptocurrency, digital shares or contracts by using Ethereum BlockChain Technology.

EcoTab projects are approved, endorsed and monitored by EcoLabel providers assigned to the EcoLabel Index.

The Ecolabel Index is the largest global directory of ecolabels, currently tracking 463 ecolabels in 199 countries, and 25 industry sectors:

<https://www.ecolabelindex.com/>

Indicators used to measure sustainable development goals for EcoLabel products and solutions are described in the following guidelines:

<https://www.un.org/esa/sustdev/natlinfo/indicators/guidelines.pdf>

EDSP.eco is supported by the .eco domain registrar. The team behind .eco has been working with the internet and environmental worlds for more than a decade to build .eco – an online home for businesses, non-profits and individuals working for a better world:
